

ART 299 Junior Review Assessment (Student)

The purpose of the ART 299 Junior Portfolio Review is to ensure students are able to apply the learning goals of our Foundations and Studio Core curriculum. Secondly, the portfolio assessment will also indicate if students are better suited to pursue the B.A. in Art with an additional major or minor that could help fulfill long-range career goals; or, who demonstrate the potential to develop “professionally oriented” competencies, and art and design sensibilities, together with a strong sense of commitment required for admission into the BFA programs.

There are three parts to the graded assessment and an additional component, the Artist/Design Statement. Part A (questions 1-10) evaluates the ability to apply the formal and technical concerns presented in our Foundations and Studio Core programs. Part B (questions 11-20) is your written Critical Self-Assessment in which you are to upload a statement describing one particular work you have submitted in this portfolio which utilizes the vocabulary of art/design in addressing the historical and/or current issues and processes. This statement should also describe the work in regards to strengths, weakness and improvement options. Part C (question 21)
